SWISS DESIGN SINCE 1998

KARL BIG — the humidifier with super power

Automatic shut-off, hygrostat, LED dimmer and filter change reminder

Compatible with Oskar filter pack

Easy refillable during operation

Function control via smartphone app

Natural humidification through evaporation technology, output up to 1100 g per hour

Despite his low power consumption, when Karl big gets going, he can humidify rooms of up to 150 m² in no time at all. Whether it is a large office or a spacious bedroom or lounge, the evaporator can provide any big space with healthy and pleasant humidity. In auto mode, Karl big adjusts his performance independently to achieve the desired level of humidity within a range of 40–55 %. The efficient evaporator has an impressive 11-liter water container that can be filled via a lift-up flap on the top of the device. And when the water container is empty, Karl big will switch off automatically. Because he is equipped with WiFi, all Karl big's functions can be controlled via an app on your smartphone and you can also check the level of humidity at any time, even when you are out and about. And for undisturbed sleep, humidifier Karl big's LED function lights can be dimmed or switched off altogether.

Black

Specifications
